

Komar University of Science and Technology

President Office

President Message

I want to take this opportunity to welcome you to the website of the Komar University of Science and Technology where you can access necessary information about the structure and the educational system, get familiar with our mission, vision and the current programs offered.

Student success is our priority; we offer a strong selection of academic programs that reflects today's high-demand fields. We are continuously committed to find ways to invest in programs, services, technology and classroom infrastructure necessary for further enhancement.

We endeavour to provide highly qualified faculty and staff who can help students reach their goals. There will be further opportunities for students, faculty and staff to cooperate with external bodies and develop the required professional skills.

I am deeply honoured and passionate to serve as the president of KUST and work with the faculty and staff at this well-established university in The Kurdistan Region of Iraq. The key principle of my presidency is to communicate effectively with faculty, staff, students, and community members by the collaboration of problem-solving in order to achieve the best service for our students. I am highly motivated to continue to expand the university's academic objectives and the growth of a vibrant campus community.

Dr. Salahalddin Saeed

President

December 7th, 2017
