

Komar University of Science and Technology

Office of President

The President Message: 2016-2017

Dr. Salah Aziz

I like to welcome you (student, faculty and staff members) back to the University again. I wish you success academically and personally.

Now that we are located at KUST's permanent campus, we have access to large spaces, many classes, central laboratory building and beautiful gardens. This environment should be used to set goals for 2016-17 which are:

- Making Komar University a community center;
- Seeking excellence through teaching and learning;
- Encouraging and supporting research and innovation;
- Starting individual and team activities of arts and sports.

While Komar is a place of learning science and technology, we should also strive for beauty and self expression through art as well as facilitating passion and determination through sports and physical activity. Based on the above goals, academic departments and supporting units will develop plans for the coming year. We anticipate a strong engagement of faculty and students to achieve the above goals.

I hope KUST will get one step closer to fulfill its mission in 2016-17.
